**expo PetroTrans and expo GasTrans:  
The date for the 2022 trade fairs has been set**

For 2022, expo PetroTrans and expo GasTrans, the specialist trade fairs for the logistics of fuels and gases, are on the starting blocks for the preparations for a comprehensive specialist exhibition with an accompanying program of lectures. The trade show could not take place in 2020 due to the Corona pandemic. Now the initiators and organizers are happy to announce the date of the upcoming event: From 22nd to 24th September 2022, the gates on the grounds of Messe Kassel will be open.

With growing numbers of visitors and a positive development of space, expo PetroTrans, the trade fair for transport, logistics and handling in the mineral oil industry, has established itself as an important business platform for fuel trading since its premiere in 2004. expo PetroTrans brings together experts from the fields of trade and freight forwarding, leading companies and innovative newcomers in the industry. The exhibitors show tank trucks, special vehicles, bodies, trailers and loading systems, services, software solutions and alternative fuels, among other things. The industrial exhibition is supplemented by a diverse and practical accompanying program with topics relating to logistics, transport and handling in the fuel economy.

"Our intention is to show decision-makers future-oriented technologies with the help of which existing business fields can be optimized and new ones opened up," says Ingo Kloever, managing director of planetfair GmbH & Co. KG, who runs expo PetroTrans in close cooperation with AVR Exhibition and Event GmbH and the Leipziger Messe. AVR Managing Director

Thomas Klocke adds: "While the legal regulations and technical standards are being developed and promoted by various associations, expo GasTrans offers a B2B platform for the presentation of transport vehicles, equipment features and digital components."

expo GasTrans and expo PetroTrans complement each other. Well-known exhibitors, in-depth forums and an attractive supporting program make the trade fair in Kassel a "must-go-to" for manufacturers of vehicles and equipment components, software providers and energy traders.

Interested exhibitors can call +49 40 710070-31 or send an email to [petrotrans@planetfair.de](mailto:petrotrans@planetfair.de).
